DETAILED ACTION

Drawings

1. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Toyohara et al (US patent 6,104,848).

With respect to claim 1, Toyohara et al discloses WDM optical transmitter comprising a pump laser source (11), an optical amplifier (21) respectively connected with output ports of said plural light sources, an optical bandpass filter (42), note cols. 2-5, see fig. 4

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Toyahara et al (US patent 6,104,848) in view of Sun et al (US patent 6,341,034).

With respect to claim 2, Toyahara et al discloses all above except for the gain flattening filter. Whereas Sun discloses the gain flattening filter, note col. 6, see fig. 10. For the benefit of an optical amplifier system with transient control using spectrally filtered input, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Toyahara with the gain flattening filter as taught or suggested by Sun.

Citation Of The Pertinent References

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
